June 23, 1989; 11:17 am - I called Brad Johnson at UT BS&HW to discuss Monticello and Richardson Flat. NILM.

June 23, 1989; 11:40 am - Brad called back. I asked whether they had looked at the Rich Flat Sample Plan that Jay Silvernale had brought over on Wednesday. Brad said he hadn't seen it yet and that Mo Slam was out of the office all week. I noted the dates (July 6-8).

I also told Brad that EPA-HQ had asked for a letter from the state on Monticello Mill Site. Specifically, the letter should contain the state's determination that SMCRA would not be applied by the state on that site. Brad said no problem and that the letter should go out today or Monday. I asked and he agreed to send a cc directly to Bob Myers at EPA-HQ.
